Analyse:

On peut remarquer que le CSS n'a aucune erreur.

Alors que le code HTML possède quand même pas mal d'erreurs mineur, mais qui pose quand même problème. J'aurais dû, lors du codage, effectué une analyse régulière de notre travail avec le détecteur d'erreur W3C.

Les points d'améliorations sont: trouver une alternative au balise href pour ajouter un lien.

Pour l'analyse écologique, je n'ai pas trouvé comment héberger notre site web pour pouvoir utiliser l'url pour pouvoir l'analyser.
